DETAILED ACTION

Notice to Applicant

1. This communication is in response to Remarks filed 12 May 2008. Claims 1-24 are presented for examination.

Information Disclosure Statement

2. The Information Disclosure Statements filed 01/17/2002; 08/04/2005; and 10/03/2006 have been acknowledged and entered.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Alexander J. Burke on 9/11/08.

The application has been amended as follows:

Claim 1, line 6, replace "supporting" with "enabling."

Claim 1, line 19, delete "and" and line 21 add "and" after phrase "providing said associate parameter..."

Claim 1, add new phrase "using said global parameter while executing said predetermined concurrently operable processes." Start new phrase on claim 1, line 22.

Claim 12, line 2, delete "said system for."

Claim 18, line 6, replace "supporting" with "enabling"

Claim 18, line 22 delete "and" and line 25 add "and" after phrase "filtering messages identifying events..."

Claim 18, add new phrase "using said global parameter while executing said multiple different process task sequences." Start new phrase on claim 18, line 26.

Cancel claims 21-24.

Allowable Subject Matter

4. Claims 1-20 are allowed.
5. The following is an examiner's statement of reasons for allowance:
 - (A) Claims 1 and 18 are directed towards a method for providing a user interface for processing an event representing a change in circumstances potentially affecting healthcare delivered to a patient.

The closest prior art of record, Brown (6,458,080), and Du(6,078,982) teach managing parameters effecting the comprehensive health of a user and a system for

allowing consistent execution of a workflow process in a computer-enabled workflow management system.

However, the closest prior art of record does not teach or fairly suggest two different categories of parameters, including a global parameter to manage healthcare workflow. The closest prior art also fails to teach using a global parameter while executing predetermined concurrently operable processes.

Dependent claims 2-17 and 19-20 incorporate the allowable subject matter of the respective independent claims through dependency and are also allowable for the same reasons.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Dahlin (2004/0122701) teaches a system and methods for integrating disease management into a physician workflow. Stewart (7,051,071) teaches a workflow integration system for enterprise wide electronic collaboration. Flores (6,073,109) teaches a computerized method and system for managing business processes using linked workflows.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to MICHELLE LE whose telephone number is (571)272-8207. The examiner can normally be reached on 8 AM - 5PM, M-F.
